PROFESSIONAL SUMMARY

Results-driven Backend Developer with 2+ years of professional experience designing and building high-performance, scalable web applications and RESTful APIs using PHP and Laravel. Adept at delivering clean, maintainable code in agile team environments with a strong foundation in database architecture and API integration. Experienced across the full stack with Vue.js and React.js frontends. Currently deepening expertise in the MERN stack (Node.js, Express.js, MongoDB, React.js) to architect comprehensive end-to-end solutions. Seeking to contribute backend expertise to a forward-thinking team with international scope.

PROFESSIONAL EXPERIENCE

Backend Developer (PHP/Laravel) | **Vibrant Tech** | Karachi, Pakistan July 2023 – Present

- Engineered and deployed 3+ production-grade web applications using Laravel and PHP, supporting hundreds of concurrent users with 99.9% uptime reliability.
- Designed and maintained scalable RESTful APIs integrated with Vue.js and React.js frontends; reduced data-fetch latency through optimized query structures and caching strategies.
- Optimized MySQL database schemas, indexing strategies, and query performance to support high-volume data management across multiple projects.
- Developed custom WordPress plugins to extend CMS functionality, reducing dependency on third-party solutions and accelerating client delivery timelines.
- Built responsive, mobile-first UIs using HTML5, CSS3, Bootstrap, Tailwind CSS, and jQuery, ensuring cross-browser compatibility and strong UX standards.
- Implemented Git/GitHub workflows across team projects, enabling parallel development, structured code reviews, and streamlined deployments.
- Collaborated in agile sprint cycles, contributing to requirements analysis, peer code reviews, and consistent on-time feature delivery.

PROJECTS

Thinkers News — News Aggregation Platform | *Laravel, PHP, REST APIs, MySQL, Bootstrap* 2026
kiethponders.customwebsitedemo.host

- Built a fully API-driven news aggregation platform that fetches real-time content from multiple third-party services including NewsAPI, Feedspot, Feedly, Spotify, and Inoreader — no local database content required.
- Integrated and managed multiple external API connections simultaneously, ensuring reliable data retrieval, error handling, and performance optimization across all sources.
- Architected a clean backend layer for API response management, data normalization, and categorized content delivery to the frontend.
- Implemented dynamic, live-updating news feeds with categorized content display, significantly improving content freshness and user experience.
- Handled complete frontend-backend integration, ensuring seamless rendering of aggregated media and news content from diverse external APIs.

Vitamiz Labs — eCommerce Platform | *Laravel, PHP, MySQL, REST APIs, Bootstrap* 2026
vitamizlabs.com

- Architected and delivered a fully functional eCommerce platform from end to end, handling both frontend and backend development independently.
- Implemented core commerce features including Add to Cart, Checkout, Shipping calculation, and Payment Gateway Integration.

- Built a custom Admin Panel enabling non-technical staff to manage all website content, products, and media dynamically with no developer intervention.
- Admin dashboard includes full order tracking, customer record management, and visual sales analytics via charts and reports.
- All website content is fully dynamic and CMS-controlled, eliminating the need for code changes on every update.

Prayer War | *Laravel, PHP, MySQL, Blade, Bootstrap* 2024

- Built a full-featured prayer management platform with secure JWT-based authentication, role-based multi-auth admin panel, and a prayer request/documentation system.
- Implemented a dynamic admin dashboard managing multiple content pages and user roles, reducing manual administrative overhead significantly.

Safe Place World | *Laravel, RESTful APIs, MySQL, Vue.js* 2024

- Designed and developed a scalable backend platform with modular RESTful APIs; optimized database indexing and query patterns to handle high-volume traffic efficiently.

Black Raters | *Laravel, Vue.js, MySQL, AJAX* 2023

- Collaborated in a team to build a dynamic movie rating and review platform; led the backend API layer and Vue.js integration for a seamless SPA-like experience.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: Laravel, Vue.js (v2/v3), React.js, jQuery, Bootstrap, Tailwind CSS

Backend & APIs: RESTful API Design, Laravel Sanctum/Passport, Core PHP, WordPress Plugin Development

Databases: MySQL, Query Optimization, Schema Design, PostgreSQL (familiar)

Tools & Platforms: Git, GitHub, Composer, npm, VS Code, Postman

Currently Learning: Node.js, Express.js, MongoDB, React.js (MERN Stack)

EDUCATION

Diploma in Web Development | AL-Fateem Academy, Karachi | June 2022 – July 2023

Intermediate (Commerce) | Board of Intermediate Education, Karachi | Dec 2019 – Nov 2021

CERTIFICATIONS & AWARDS

- Meta Front-End Developer Specialization – AL-Fateem Academy, 2023
- PHP for Everybody Specialization – AL-Fateem Academy, 2023
- Computational Problem Solving – AL-Fateem Academy, 2023
- Certificate for Outstanding Academic Performance
